## Quality protection

- Slats in polycarbonate, a transparent material like glass and 10 times more insulating, 250 times more impact resistant than glass with the same thickness. Treated against UV rays. It retains 95% of ultraviolet rays and protects the interior of the premises from yellowing.
- Elements connected to one another by an aluminium profile extruded raw or thermo-lacquered.
- End element in galvanised or thermo-lacquered steel, with lock and sealing gasket.
- Guides 70x60x70 mm in galvanised or thermo-lacquered steel, equipped with gasket for quieter sliding.
- Bevelled shape shutter box, in galvanised or thermo-lacquered steel.

# TRANSPARENCE

by Javey®

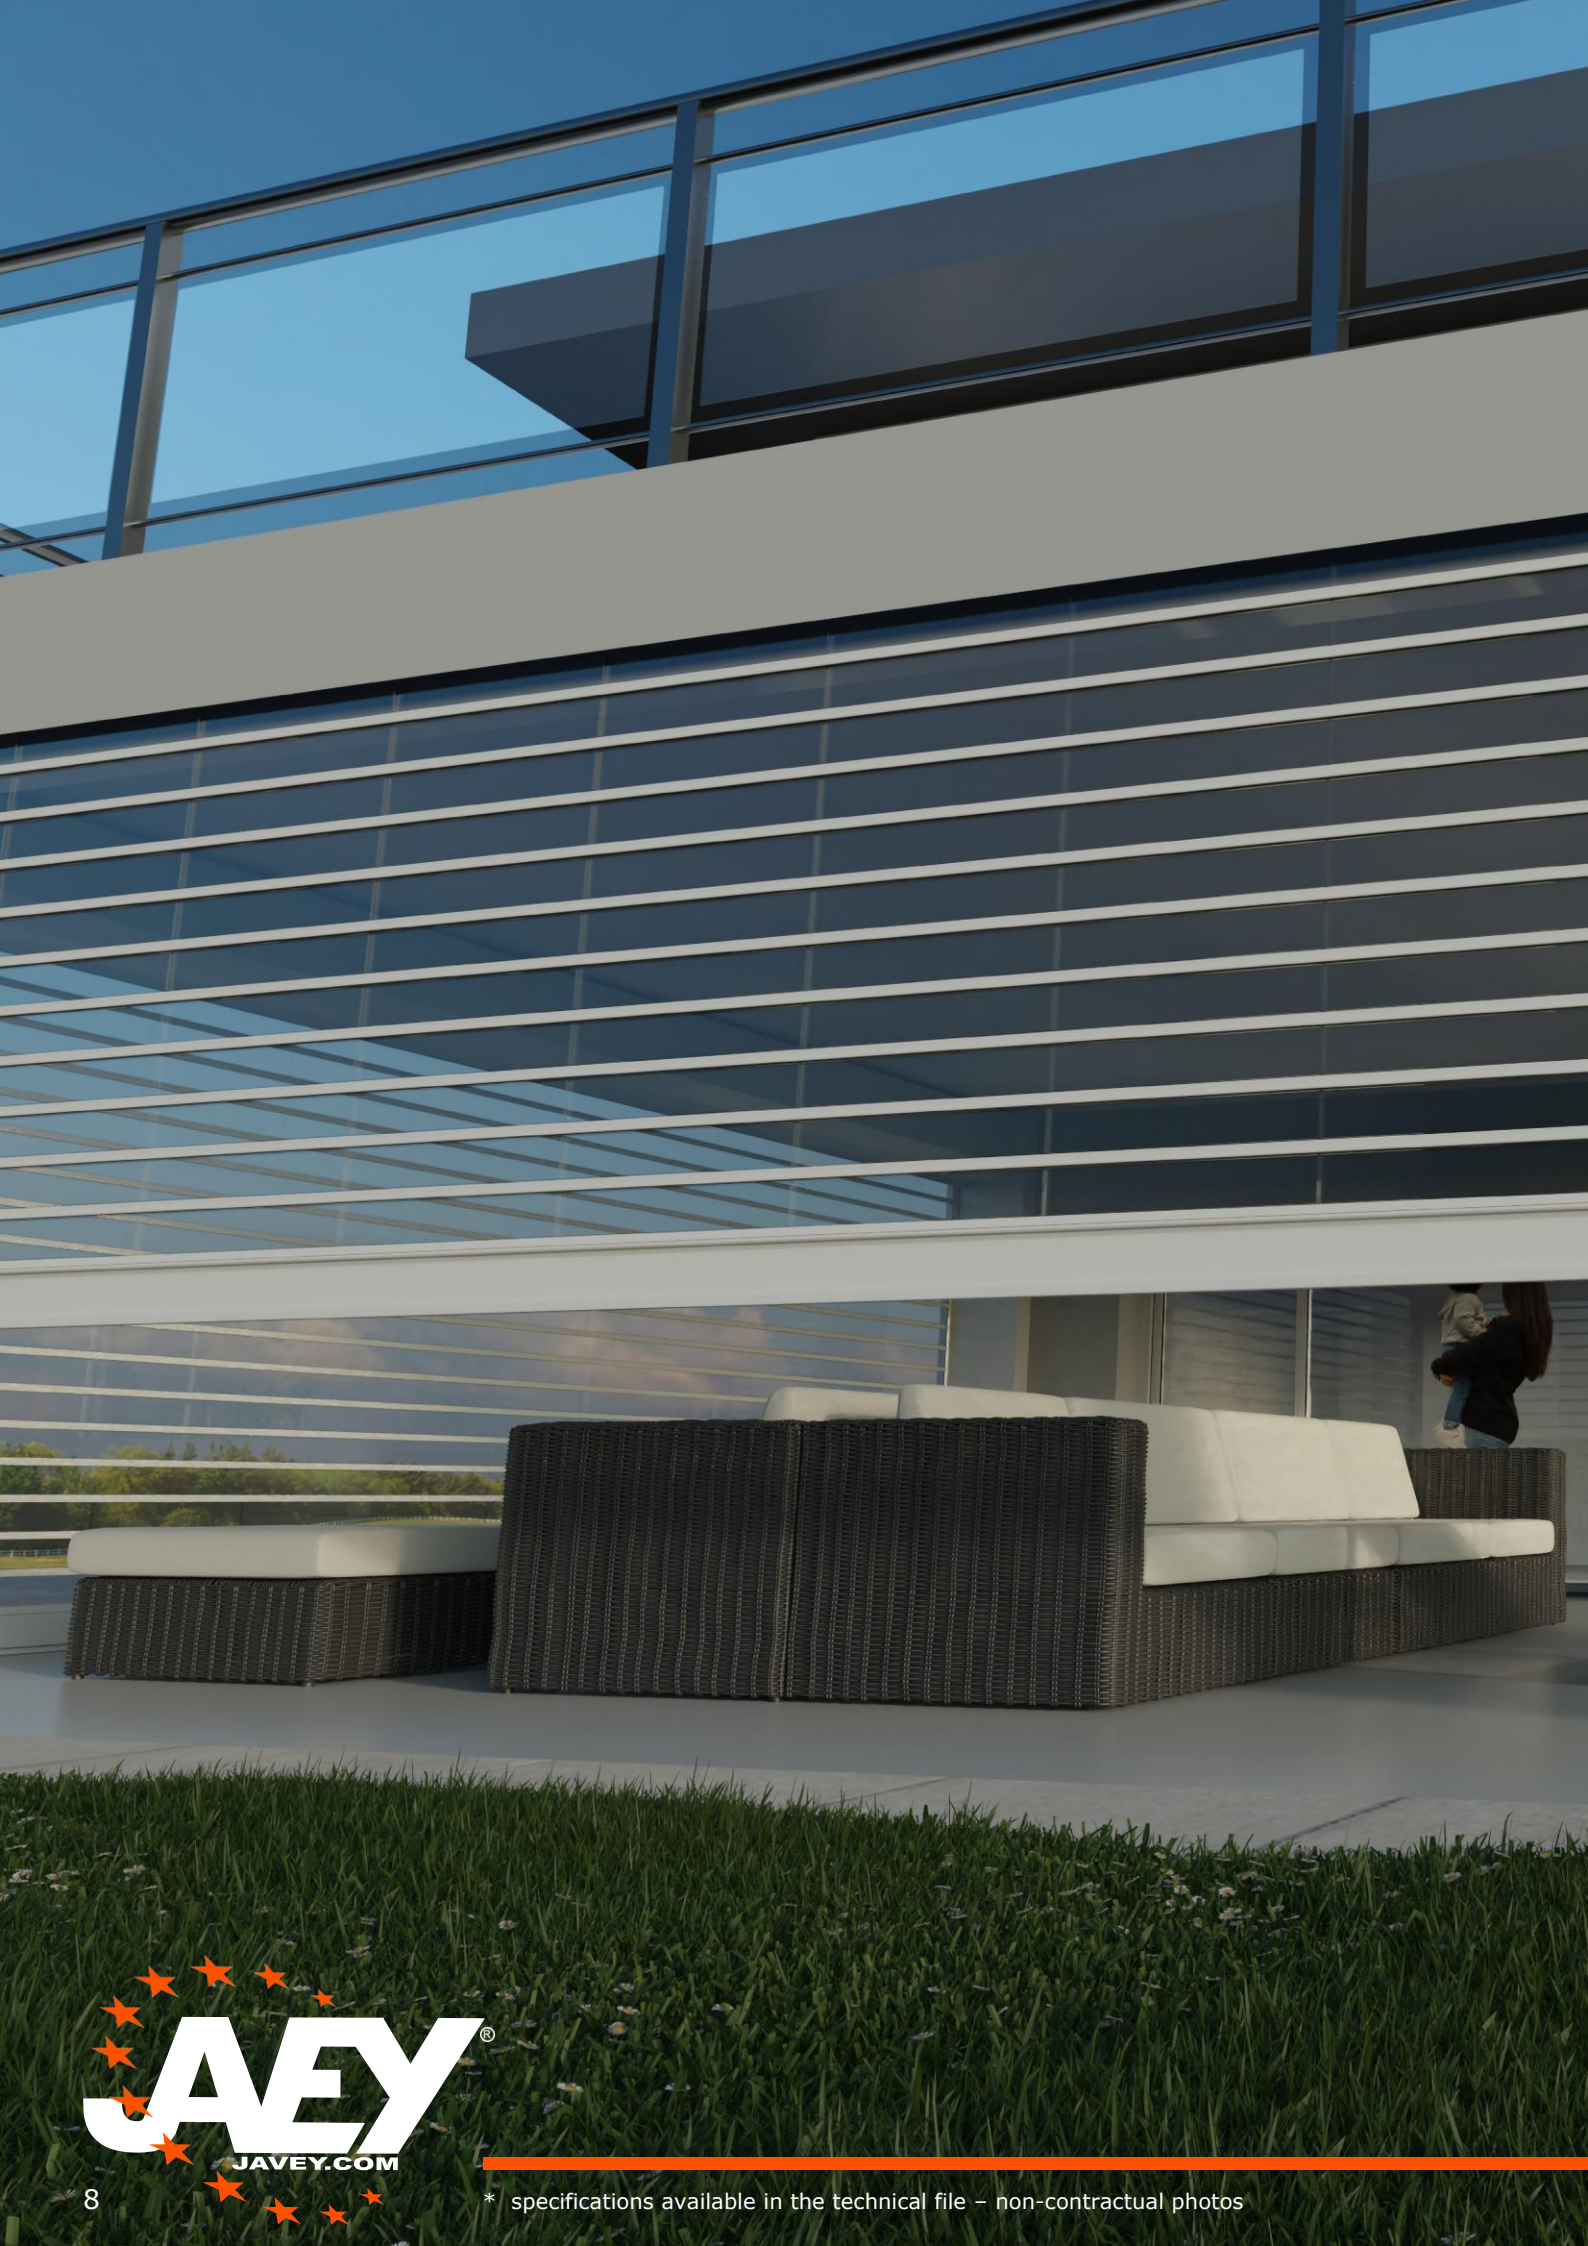

In the gym, swimming pool, hotel or outdoor restaurants, the TRANSPARENCE security shutter by Javey® lets in the light, protecting the room from the cold and bad weather.

It embellishes the windows and allows passers-by to look at them even when you are closed. The quality of the polycarbonate protects against vandalism, burglary and theft.

Opening and closure of the shutter is very easy thanks to the motor. In good weather, you'll have a fully open space at the touch of a button, so you can enjoy the exterior view and additional space.

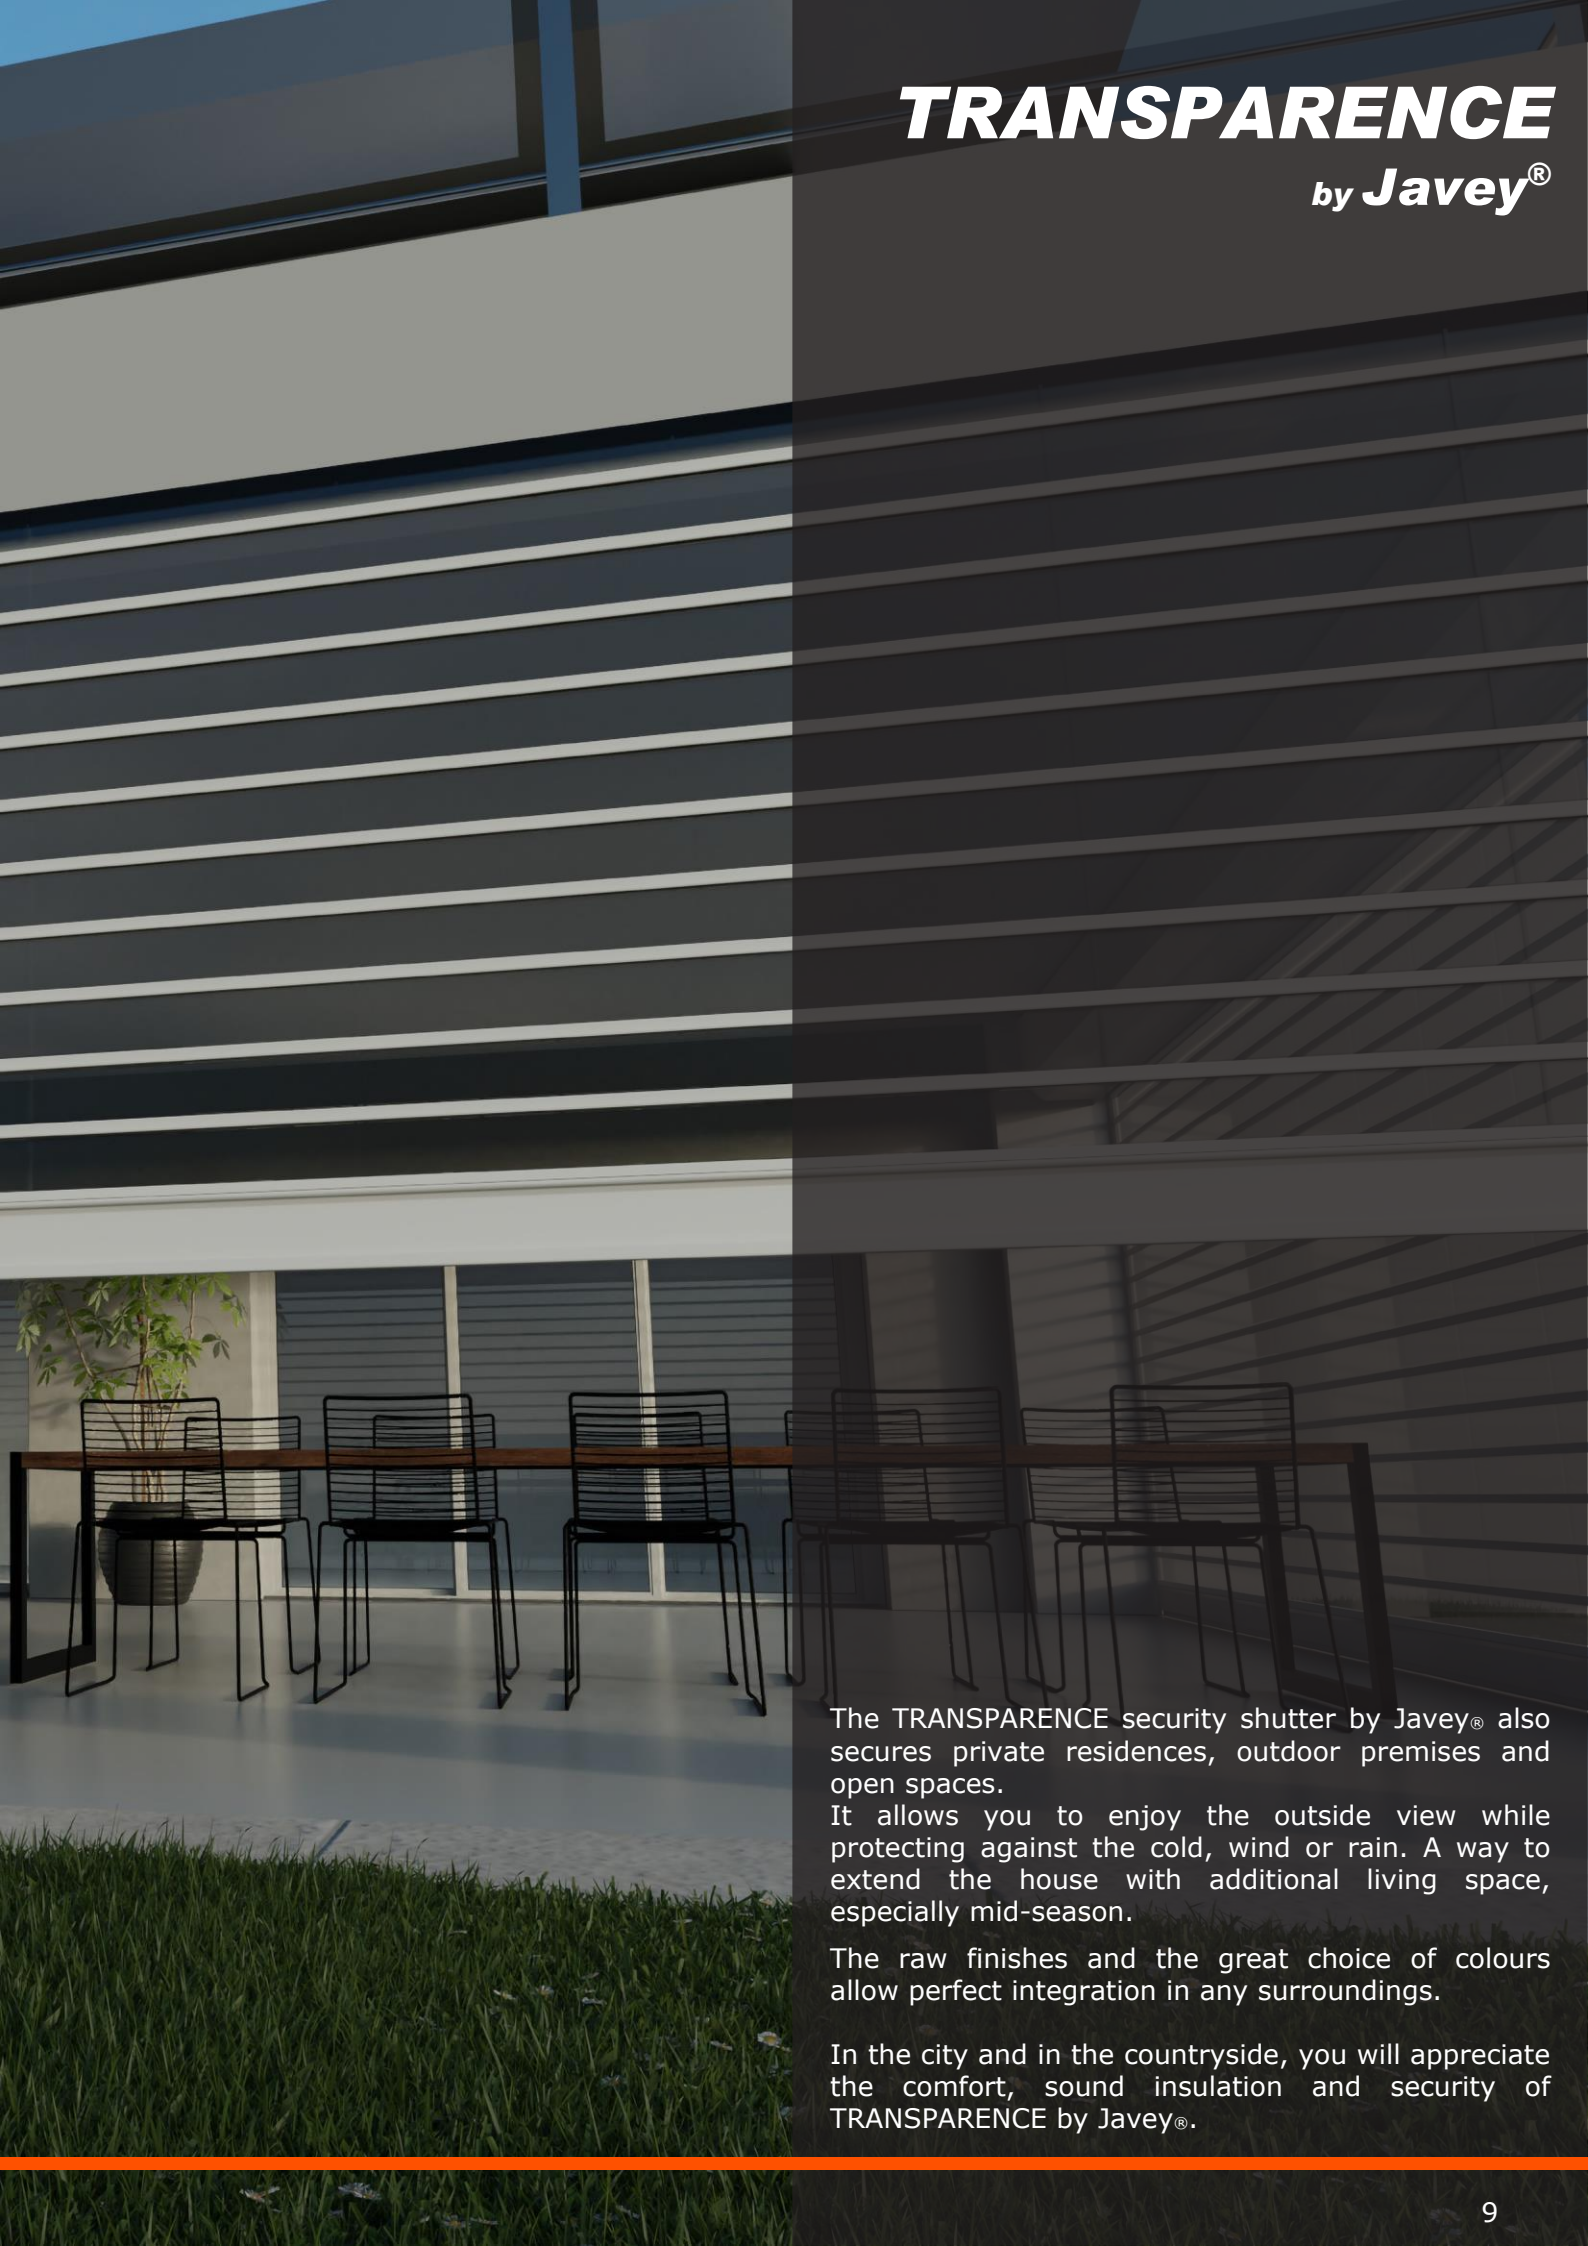

When the shutter is equipped with a central motor, the protection against theft is even higher thanks to a side lock as standard on the end element.

# TRANSPARENCE

by Javey®

The TRANSPARENCE security shutter by Javey® also secures private residences, outdoor premises and open spaces.

It allows you to enjoy the outside view while protecting against the cold, wind or rain. A way to extend the house with additional living space, especially mid-season.

The raw finishes and the great choice of colours allow perfect integration in any surroundings.

In the city and in the countryside, you will appreciate the comfort, sound insulation and security of TRANSPARENCE by Javey®.

## Daily well-being

The TRANSPARENCE security damper by Javey® is the ideal solution for all spaces where transparency can improve well-being thanks to visibility and daylight.

TRANSPARENCE by Javey® allows you to enjoy in all seasons the beauty of your living environment (view of the garden, the sea or the mountain).

It transforms windows on a veranda or winter garden, protecting them from attempted break-ins without concealing light; it is ideal for green plants positioned in the rooms.

It allows you to enjoy a covered terrace all year round, isolating it from the cold, humidity and wind.

Thanks to TRANSPARENCE by Javey®, you will enjoy the benefits of daily and prolonged exposure to daylight. It's the ideal solution for energising yourself, fighting stress and sleeping better.
